

ABDINADIF MUSSE OMAR

Computer Science & Engineering Student | Software Developer

Islamic University of Technology (IUT), Bangladesh
University: abdinadiif@iut-dhaka.edu | Personal: abdiladifgalde992@gmail.com
GitHub: github.com/abdinadifgalde | Team: Future Vision

PROFILE

Computer Science & Engineering student with hands-on experience building web and desktop software, working with databases, and developing practical university-focused solutions. Experienced with Python/Flask and currently advancing a Java 21 + JavaFX desktop redesign of the IUT Appointment Management System. Interested in software engineering, system design, automation, and reliable real-world applications.

EDUCATION

Islamic University of Technology (IUT)

B.Sc. in Computer Science & Engineering

Currently: 4th Semester

AL-AQSA SECONDARY SCHOOL

Higher Secondary School • 2017–2021

TECHNICAL SKILLS

- **Languages:** Java, Python, C, C++, SQL
- **Web:** Flask, HTML5, CSS3, JavaScript, Bootstrap
- **Java:** Java 21, JavaFX, FXML, Scene Builder, Maven
- **Databases:** PostgreSQL, MySQL, SQLite, H2
- **ORM/Backend:** Hibernate/JPA, SQLAlchemy
- **Tools:** Git, GitHub, VS Code, Render, Figma, Canva
- **Libraries:** ZXing, JavaMail, ControlsFX, FontAwesomeFX

CORE STRENGTHS

- Problem solving and algorithmic thinking
- Full-stack application development
- Database design and SQL
- MVC / layered software architecture
- UI/UX and technical presentation
- Team collaboration and continuous learning

COURSEWORK

Database Management Systems • Structured Programming •
Object-Oriented Programming • Software/System Development

FEATURED PROJECT

IUT Appointment Management System

Team: **Future Vision** • University-focused appointment platform

- Designed and developed a Flask-based appointment management platform for students and university offices.
- Implemented role-based access for students, officers, advisors, registrars, and administrators.
- Built booking, approval workflows, email notifications, QR verification, reminders, analytics, waitlist auto-promotion, and dark mode.
- PostgreSQL-backed system with authentication, dashboards, and deployment workflow.
- Currently redesigning the system as a Java 21 + JavaFX desktop application using MVC, DAO/service layers, Hibernate/JPA, Maven, and PostgreSQL.

ACHIEVEMENTS & EVENTS

Techathon 2.0 — IUT Robotics Society

Poster Presentation • **1st Runner-Up**

Techathon Nationals & Rover Summit 2026

Participant • IUT Robotics Society

Poster design, project presentation, visual communication, and technology-focused university activities.

DEVELOPMENT FOCUS

- Java desktop application engineering
- PostgreSQL database architecture
- Professional JavaFX UI with FXML and CSS
- QR-code verification and notification workflows
- Secure authentication and role-based authorization
- Production-quality software architecture

INTERESTS

Software Engineering • AI & Automation • Robotics • Database Systems •
UI/UX • Technology Innovation • Football

CAREER OBJECTIVE

To grow into a professional software engineer by building scalable, user-centered systems and applying strong programming, database, and software architecture skills to meaningful real-world problems.
